## Consultation Report

Exam Date / Time	Exam Type	Order MD	Accession #
2014/03/23 14:39	CT Angio Head	Kang, Han Sol	CN-14-0008334

### CT HEAD ANGIOGRAM

#### CLINICAL INFORMATION:

Query mid brain infarct

#### TECHNIQUE:

Contiguous transaxial scans obtained with intravenous contrast

COMPARISON: CT head March 23, 2014

#### FINDINGS:

A low attenuation area is suggested in the pons on the right side suspicious for an infarct. MRI would be helpful for further evaluation. The cerebral vessels are small in caliber but no abnormality is identified.

#### INTERPRETATION:

Possible infarct right pons. MRI would be useful for further evaluation
